34610	7590	10/06/2004	EXAMINER	
FLESHNER & KIM, LLP P.O. BOX 221200 CHANTILLY, VA 20153			DELGADO, MICHAEL A	
			ART UNIT	PAPER NUMBER
			2144	

DATE MAILED: 10/06/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/735,532

Applicant(s)

JIN, CHAE HEE

Examiner

Michael S. A. Delgado

Art Unit

2144

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4, 6-10 and 12-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4, 6-10 and 12-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- 1) ☒ Certified copies of the priority documents have been received.
 - 2) ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 6-10 and 12-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 6-10 and 12-26 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,370,389 by Isomursu et al.

In claim 1, Isomursu teaches about a method of sending personal information using a mobile terminal comprising (Fig 2):

setting a sending mobile terminal to a personal information transmission mode (Col 7, lines 5-20);

inputting personal information data for transmission (Col 2, lines 65-67);

inputting a phone number corresponding to a receiving mobile terminal to receive the personal information data (Col 5, lines 10-25) ;

inserting identification information distinguishing the personal information data from other types of data into a user data field of a short message (Col 7, lines 5-20); and

transmitting the personal information data to said receiving mobile terminal using a SMS Short Message Service (SMS) with the identification information (Col 5, lines 10-25) (Col 7, lines 15-25) .

In claim 2, Isomursu teaches about a method of claim 1, wherein the personal information data is at least one of a name, a phone number, an address, a business name, an email address or a facsimile number (Fig 6).

In claim 3, Isomursu teaches about a method of claim 1, wherein the personal information data input for transmission is personal information data stored in advance (Col 7, lines 5-10).

In claim 4, Isomursu teaches about a method of claim 1, wherein inputting the phone number inputs the phone number automatically using a phone number list stored in the sending mobile terminal (Col 16, lines 20-30) .

In claim 6, Isomursu teaches about a method of claim 1, wherein inserting the identification information inserts the identification information into a first portion of the user data field for short messages (Col 7, lines 5-25) .

In claim 7, Isomursu teaches about a method of claim 1, wherein transmitting the personal information data to said receiving mobile terminal comprises:

receiving a command to transmit the personal information data through a keypad of the sending mobile terminal (Col 5, lines 10-25) (Col 5, lines 60-65); The send or talk button on a mobile phone initiates the transfer.

generating the personal information data as a the short message if a command to transmit the personal information is received (Col 5, lines 10-25);and

transmitting the short message (Col 5, lines 25-35) .

In claim 8, Isomursu teaches about a method of claim 7, wherein transmitting the short message comprises:

transmitting the short message to a mobile switching station through a BSC (Col 4, line 55- Col 5, line 10);

transmitting the short message from the MSC to an SMS center connected to the mobile switching center (Col 4, line 55- Col 5, line 10);

obtaining, at the SMS center, location information of the receiving mobile terminal using a home network location register of the sending mobile terminal (Col 5, lines 25-35); There has to be a routing list for the SM-SC to be able to locate MS2 or the other mobile station.

transmitting the short message to a receiving mobile switching center connected to a serving BSC of the receiving mobile terminal according to the location information of the receiving mobile terminal (Col 4, line 55- Col 5, line 10); and

transmitting the short message to the receiving mobile terminal through the serving BSC (Col 4, line 55- Col 5, line 10).

In claim 9, Isomursu teaches about a method of claim 1, further comprising displaying a message indicating a completion of the personal information transmission when the personal information is transmitted (Col 5, lines 25-35) (Col 8, lines 40-55). The feedback capabilities support this feature.

In claim 10, Isomursu teaches about a method of receiving personal information using a mobile terminal comprising (Fig 2):

determining at a receiving mobile terminal if a received short message is for personal information data transmission by checking whether the received short message has identification information distinguishing the personal information data from other types of data in a user data field of the short message (Col 7, lines 5-25);

displaying the received short message on the receiving mobile terminal and determining whether to store the received short message based upon a user input, if the received short message is for personal information data transmission (Col 14, lines 40-65) ; and

storing the received short message if the user input indicates storing the received short message (Col 14, lines 55-60).

In claim 12, Isomursu teaches about a method of claim 10, wherein in displaying the received short message, generating a tone to indicate a receipt of the received short message using one of either a speaker or a buzzer, when the received short message is displayed (Col 14, lines 40-55).

In claim 13, Isomursu teaches about a method of claim 10, wherein in storing the received short message, storing the received short message in a telephone number list of the receiving mobile terminal (Col 8, lines 1-15) .

In claim 14, Isomursu teaches about a system of sending and receiving personal information using mobile terminals comprising (Fig 2):

setting a sending mobile terminal to a personal information transmission mode (Col 7, lines 5-20);

inputting personal information data for transmission (Col 2, lines 65-67);

inputting a phone number corresponding to a receiving mobile terminal to receive the personal information data (Col 5, lines 10-25);

transmitting the personal information data to said receiving mobile terminal as a short message with an identification information (Col 5, lines 10-25) (Col 7, lines 15-25);

determining at the receiving mobile terminal if the short message is for personal information data transmission by reading the identification information from a user data field of a received short message (Col 3, lines 5-15);

displaying the short message on the receiving mobile terminal and determining whether to store the short message based upon a user input, if the short message is for personal information data transmission (Col 7, lines 30-40); and

storing the short message if the user input indicates storing the short message (Col 5, lines 25-35).

In claim 15, Isomursu teaches about a system of claim 14, wherein in the identification information into is read from a first portion of the user data field for short messages (Col 7, lines 5-25).

In claim 16, Isomursu teaches about a method system of claim 14, wherein transmitting the personal information data to said receiving mobile terminal comprises:

receiving a command to transmit the short message through a key pad of the sending mobile terminal (Col 5, lines 10-25) (Col 5, lines 60-65); The send or talk button on a mobile phone initiates the transfer.

generating the personal information data as the short message if the command to transmit the short message is received (Col 5, lines 10-25);and
transmitting the short message (Col 5, lines 25-35).

In claim 17, Isomursu teaches about a method system of claim 16, wherein transmitting the short message comprises:

transmitting the short message to a mobile switching station through a BSC (Col 4, line 55- Col 5, line 10);

transmitting the short message from the MSC to an SMS center connected to the mobile switching center (Col 4, line 55- Col 5, line 10);

obtaining, at the SMS center, location information of the receiving mobile

Art Unit: 2144

terminal using a home network location register of the sending mobile terminal (Col 5, lines 25-35);

transmitting the short message to a receiving mobile switching center connected to a serving BSC of the receiving mobile terminal according to the location information of the receiving mobile terminal (Col 4, line 55- Col 5, line 10); and

transmitting the short message to the receiving mobile terminal through the serving BSC (Col 4, line 55- Col 5, line 10).

In claim 18, Isomursu teaches about a system of claim 14, further comprising displaying a message indicating a completion of the personal information transmission when the personal information is transmitted (Col 5, lines 25-35) (Col 8, lines 40-55). The feedback capabilities support this feature.

In claim 19, Isomursu teaches about a system of claim 14, wherein determining if the received short message is for personal information is performed by checking whether the received short message has the identification information (Col 3, lines 5-15).

In claim 20, Isomursu teaches about a system of claim 14, wherein in storing the short message, storing the received short message in a telephone number list of the receiving mobile terminal (Col 8, lines 1-15). This is incorporated in the call back feature.

Art Unit: 2144

In claim 21, Isomursu teaches about a method of claim 1, wherein the user data field comprises:

- an encoding field indicating a coding type of the short message (Col 3, lines 5-15);
- a message type field indicating a type of the short message (Col 3, lines 5-15); and
- a Chari field including the identification information "field where message is located" (Col 3, lines 5-15).

In claim 22, Isomursu teaches about a method of claim 10, wherein the user data field comprises:

- an encoding field indicating a coding type of the short message (Col 3, lines 5-15);
- a message type field indicating a type of the short message (Col 3, lines 5-15); and
- a Chari field including the identification information "field where message is located" (Col 3, lines 5-15).

In claim 23, Isomursu teaches about a system of claim 14, wherein the user data field comprises:

- an encoding field indicating a coding type of the short message (Col 3, lines 5-15);
- a message type field indicating a type of the short message (Col 3, lines 5-15); and
- a Chari field including the identification information "field where message is located" (Col 3, lines 5-15).

In claim 24, Isomursu teaches about a method of claim 21, wherein the user data field further comprises:

Art Unit: 2144

a subparameter ID field for a subparameter identifier (Col 5, lines 35-50) (Col 7, lines 15-35); The business card identifier within the frame header.

a subparameter length field indicating a length of the short message other than the subparameter ID field (Col 5, lines 35-50) (Col 7, lines 15-35);

a Num_field indicating a character length Num_field by which value the data of the Chan field is repeated (Col 5, lines 35-50) (Col 7, lines 15-35); and

a reserved field (Col 5, lines 35-50) (Col 7, lines 15-35).

In claim 25, Isomursu teaches about a method of claim 22, wherein the user data field further comprises:

a subparameter ID field for a subparameter identifier (Col 5, lines 35-50) (Col 7, lines 15-35);

a subparameter length field indicating a length of the short message other than the subparameter ID field (Col 5, lines 35-50) (Col 7, lines 15-35);

a Num_field indicating a character length Num_field by which value the data of the Chari field is repeated (Col 5, lines 35-50) (Col 7, lines 15-35); and

a reserved field (Col 5, lines 35-50) (Col 7, lines 15-35).

In claim 26, Isomursu teaches about a system of claim 23, wherein the user data field further comprises:

a subparameter ID field for a subparameter identifier (Col 5, lines 35-50) (Col 7, lines 15-35);

a subparameter length field indicating a length of the short message other than the subparameter ID field (Col 5, lines 35-50) (Col 7, lines 15-35);

a Num_ field indicating a character length Num_ field by which value the data of the Chari field is repeated (Col 5, lines 35-50) (Col 7, lines 15-35); and

a reserved field (Col 5, lines 35-50) (Col 7, lines 15-35).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US patent no. 6,563,494 by Eichstaedt et al. teaches about a cut and paste pen for pervasive computing devices

Art Unit: 2144

US patent no. 5,794,142 by Alperovich teaches about a mobile terminal having network services activation through the use of point-to-point short message service.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael S. A. Delgado whose telephone number is (571) 272-3926. The examiner can normally be reached on 7.30 AM - 5.30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM A CUCHLINSKI JR can be reached on (571) 272-3925

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
